### [DETERMINATION OF THE GRAVITATIONAL CONSTANT G BY MEANS OF A BEAM BALANCE](#)

FEATURES force has extrema close to each end of the Determination of the gravitational hole. Since the field masses are moved such that the test masses are at an extremum, the gravitational force acting on a test constant G by means of a beam mass is to first order independent of the test mass position, reducing the required accuracy of the distances between the field balance and test masses. In order...
